Office Action Summary

Serial Number: 09/778,872

Art Unit: 2834

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 24-40, drawn to a film acoustic wave device, classified in class 310, subclass 334.

II. Claims 41-59, drawn to a method of manufacturing an acoustic wave device, classified in class, subclass 25.35.

The inventions are distinct, each from the other because:

The Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the acoustic wave device of Group I can be made by methods other than those of Group II, e.g. the two electrodes could be simultaneously formed, or the electrodes could be performed and adhered to the piezo element, or the piezo element could be performed and adhered to the bottom electrode etc. Note MPEP 806.05(f) states that "A product defined by the process by which it can be manufactured is still a product claim (In re Bridgeford, 357 F.2d 679, 149 USPQ55) and can be restricted from the process ---".

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Serial Number: 09/778,872

Art Unit: 2834

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Note that claims 17-23 are "ungrouped" as they depend from canceled claim 16. They are thus not examinable.
